THARINI DULANJALEE MALAVIGE

IT Professional | MIS Research Graduate | Customer Care and Technical Support Specialist

Riga, Latvia | (+371) 25450934 | dulanjaleemalavige@gmail.com | LinkedIn | GitHub Portfolio | GitHub

PROFESSIONAL SUMMARY

Telecommunications Customer Care and Technical Support specialist with 8 years of experience in the telecommunications industry. Experienced in managing high-volume call queues, giving first-line technical support, and resolving issues for both customers and 80+ internal users, while meeting SLA and KPI targets. Strong in problem solving and working with IT and business teams to close support requests. Used basic SQL to find and fix data issues in employee records and ERP databases and supported small automation tasks using Java and web tools (PHP/Laravel, HTML, CSS, JavaScript).

CORE COMPETENCIES

- Python / Machine Learning
- SQL / Oracle / MySQL / ERP
- Ensemble ML (Random Forest, GB)
- PHP / Laravel / JavaScript
- ITS / Digital Twin (MTDT)
- Plotly / Streamlit / Jupyter
- Cisco Networking (CCNA)
- HTML / CSS / Bootstrap / Vue.js

EDUCATION

Master of Natural Science – Management of Computer Information Systems Feb 2024 – Feb2026

Transport and Telecommunication Institute (TSI), Riga, Latvia | tsi.lv

Thesis Grade: 7.03 | Fields: IT Project Management, Intelligent Systems, Data Security, Database Technologies

Thesis: Framework for Integrating Intelligent Transportation Systems Concepts for Sri Lanka

- Designed the MTDT framework using quantitative design-science research methodology; achieved Random Forest $R^2 = 0.7545$ for congestion prediction and 94.66% classification accuracy across 10 Sri Lankan cities on a synthetic dataset of 5,000+ transport records.
- Applied international data standards: GTFS, DATEX II, ISO 8601, and WGS84; real-time decision support and weather impact modelling incorporated; visualizations built with Plotly and Streamlit.

Thesis Repository: github.com/dula995/ITS_framework

Bachelor of Information Technology (BIT) – External Degree Feb 2017 – Feb 2021

University of Moratuwa, Sri Lanka | uom.lk

Final Grade: 2.93 | Fields: Software & Applications Development, ICT, Database & Network Design

Thesis: Online Tailoring Web Application using Laravel

- Built a full-stack e-commerce system as undergraduate thesis using Laravel (PHP), Vue.js, Node.js, MySQL, HTML/CSS, Bootstrap, propper.js, and AJAX.
- Gained hands-on expertise in web technologies, database administration, and software engineering principles across a four-year external degree program.

Project Repository: github.com/Dula-GitHub/Online-Tailoring-Web-Application

OTHER QUALIFICATIONS

CCNA – Cisco Certified Network Associate	University of Moratuwa – Cisco Networking Center	Oct 2022 – Jan 2024
IELTS Academic		May 2023
Advanced Certificate – Professional Sales Officer Program	Sri Lanka Telecom, Colombo	Jan – Apr 2021
GCE Advanced Level (A/L)	Biology, Physics, Chemistry	Oct 2012 – Aug 2015
IGCSE EDEXCEL (O/L)	Biological Sciences	May 2012

WORK EXPERIENCE

Technical Support & Customer Service Specialist Mar 2021 – Mar 2024

Sri Lanka Telecom – Ragama OPMC, Sri Lanka

- Independently resolved 80+ employee support requests, meeting SLA targets and internal KPIs across IT and business teams.
- Applied SQL to diagnose data discrepancies in employee records and ERP databases; developed automation scripts using Java, PHP (Laravel), HTML, CSS, and JavaScript.
- Managed workload autonomously without direct supervision, demonstrating agility when business priorities shifted.

Customer Feedback Representative Apr 2016 – Feb 2021

SLT Human Capital Solutions, Colombo 01, Sri Lanka

- Managed high-volume call queues providing first-line technical assistance, maintaining SLA response times and service quality.
- Communicated technical solutions clearly to diverse audiences; applied programming knowledge (Laravel, PHP, Java) to identify automation improvements.

TECHNICAL PROJECTS

Intelligent Transportation System Framework for Sri Lanka – Master's Thesis (2024–2026) | github.com/dula995/ITS_framework

Designed and validated the Multimodal Intelligent Transportation System Digital Twin (MTDT) framework using ensemble machine learning (Random Forest, Gradient Boosting) on a synthetic dataset of 5,000+ transport records across 10 Sri Lankan cities. Results: $R^2 = 0.7545$ for congestion prediction and 94.66% classification accuracy. Incorporates real-time decision support, weather impact modelling, and compliance with GTFS, DATEX II, ISO 8601, and WGS84. Supervised by Prof. Dr. sc. ing. Mihails Savrasovs, TSI Riga.

Online Tailoring Web Application – Bachelor Thesis (2019–2020) | github.com/Dula-GitHub/Online-Tailoring-Web-Application

Full-stack e-commerce applications built with PHP (Laravel), Vue.js, Node.js, MySQL, HTML/CSS, Bootstrap, propper.js, and AJAX. Developed as undergraduate thesis at the University of Moratuwa, demonstrating end-to-end system design and development capability.

Student GPA Calculator (2018) | Music Band Website (2017)

Desktop GPA calculator built with VB.NET and MS Access for semester academic record management. Static music band website developed using HTML, CSS, and JavaScript — early projects demonstrating foundational programming and UI development skills.
